#### About Quest Rare Minerals

*Quest Rare Minerals Ltd. is a Canadian-based exploration company focused on the identification and discovery of new and significant Rare Earth deposit opportunities. Quest is publicly listed on the TSX Venture Exchange and NYSE Amex as “QRM” and is led by a highly-respected management and technical team with a proven mine finding track record. Quest is currently advancing several high-potential projects in Canada’s premier exploration areas: the Strange Lake and Misery Lake areas of northeastern Québec and the Plaster Rock area of northwestern New Brunswick. Quest’s 2009 exploration led to the discovery of a significant new Rare Earth metal deposit, the B-Zone, on its Strange Lake property in northeastern Québec. Quest recently filed a 43-101 Indicated and Inferred Resource Estimate on the B-Zone deposit and has completed a Preliminary Economic Assessment (PEA) for the deposit. In addition, Quest announced the discovery of an important new area of REE mineralization on its Misery Lake project, approximately 120 km south of Strange Lake project. Quest continues to pursue high-value project opportunities throughout North America. As a result of a marketed equity financing completed in October 2010, Quest has a strong working capital position of \$50.0 million. This will be sufficient to advance Quest’s plans of completing pre-feasibility and Bankable feasibility studies of the B-Zone REE deposit by 2012 and to continue exploration on its other rare earth property interests.*
